DEFINE – Understanding the Problem

WHO ARE WE DESIGNING FOR?

High School Students

Teens managing multiple subjects, struggling to stay organized and avoid distractions while building early study habits.

College Students

Frustrations: phone distractions, postponed assignments, lack of consistency.

Exam Preparers

Students preparing for competitive exams who need structured focus sessions, progress tracking, and motivation to stay consistent.

Students Seeking Productivity

Learners who struggle with digital distractions and need clear goals, accountability tools, and progress visibility to improve focus.

POINT OF VIEW (POV)

Understanding the needs, frustrations and motivations of our primary user.

OUR PRIMARY USER – COLLEGE STUDENT

Persona: Arun

-  **Age:** 20
-  **Goals:**
Complete tasks on time, build consistent habits, improve academic performance.
-  **Frustrations:**
Phone distractions, postponed assignments, lack of consistency, irregular study schedule.

POINT OF VIEW (POV)

“

College students who **struggle with procrastination** need a **structured and motivating** way to manage their study tasks **because** digital distractions, poor time management, and lack of motivation make it difficult to stay **focused** and **consistent**.

”

KEY NEEDS

Better time management

Improved focus

Motivation & accountability

Clear goals & structure

Progress tracking & visibility

KEY INSIGHTS

Digital distractions are everywhere

Tasks feel overwhelming

Motivation drops over time

Unclear priorities lead to delay

Lack of consistency affects results

Self-Proctored Learning Excellence

TARGET USER

WHO ARE WE DESIGNING FOR?

Students (high school and college) who struggle with procrastination and want to build consistent study habits in a fun, motivating way.

PROBLEM STATEMENT

How might we design a system that motivates students to stay focused, complete tasks on time, and build consistent study habits while reducing procrastination?

TARGET USERS

High School Students

College Students

Students Preparing for Exams

Students Who Struggle With Distractions

Students Seeking Better Study Habits

Self-Proctored Learning Excellence

SAYS

- "I always plan to study but end up delaying."
- "I get easily distracted by social media and games."
- "I need more motivation to stay consistent."
- "I wish studying could feel more fun and engaging."

THINKS

- Why do I keep putting things off?
- Can I really complete my tasks if I start now?
- What if I fall behind again?
- I need small wins to build confidence.

DOES

- Makes to-do lists but rarely follows them
- Delays tasks until the last minute
- Gets distracted by phone, social media, or games
- Studies in irregular, unplanned bursts

FEELS

- Overwhelmed by tasks and deadlines
- Anxious about falling behind peers
- Guilty and disappointed after procrastinating
- Happy when achieving small goals

PAINS

- Lack of motivation and self-discipline
- Easily distracted by digital entertainment
- Difficulty tracking progress and staying consistent
- Traditional study feels boring and repetitive

GAINS

- Clear goals and fun challenges
- Rewards, points, and badges for achievements
- Visual progress tracking and streaks
- Improved focus, confidence, and performance

DEFINE – Problem Statement

How Might We...?

How might we design a system that motivates students to stay focused, complete tasks on time, and build consistent study habits while reducing procrastination?

Key User Needs:

- Motivation
- Accountability
- Focus
- Clear Goals
- Progress Visibility
- Consistency

Design Challenge

Design a simple, engaging solution that helps students take responsibility for their own learning and overcome procrastination.

This solution must empower students with the tools, structure, and motivation needed to build lasting self-directed study habits and achieve consistent academic progress.

IDEATE – Generating Possible Solutions

Focus Timer

Timed focus sessions to boost concentration and reduce distractions

Smart Planner

Personalized study planner with task scheduling and deadline tracking

AI Assistant & Dashboard

Smart reminders, progress tracking, and AI-powered study recommendations

Self-Proctored Sessions

Student-led study sessions with accountability and self-monitoring tools

Fun Activities

Points, badges, and study streaks to motivate consistent learning habits

IDEATION TECHNIQUES

SCAMPER METHOD

We used SCAMPER to think creatively and improve ideas for reducing student procrastination.

S SUBSTITUTE

Replace phone time with focus sessions.

Example:
Replace social media scrolling with focused study blocks.

C COMBINE

Merge planner + timer + rewards.

Example:
Combine a study planner, focus timer and rewards system.

A ADAPT

Borrow streaks from fitness apps.

Example:
Adapt daily/weekly streaks to encourage consistent studying.

M MODIFY

Adjust session length to student pace.

Example:
Let students customize focus session duration.

P PUT TO USE

Use gamification for motivation.

Example:
Use points, badges and levels to keep students motivated.

E ELIMINATE

Remove distractions during study.

Example:
Block distracting apps during focus sessions.

R REARRANGE

Reorder tasks by priority & energy.

Example:
Arrange tasks based on priority and time-of-day energy levels.

- ✓ Plan
- ✓ Focus
- ✓ Track
- ✓ Motivate
- ✓ Achieve

Mind Mapping

GALLERY WALK & IDEA VOTING

We displayed our ideas, reviewed and discussed each one, evaluated using key criteria, and voted for the best solution.

1 DISPLAY IDEAS

Ideas generated during brainstorming.

Focus Timer

Smart Study Planner

Gamification

AI Study Assistant

Self-Proctored Learning System

2 REVIEW & DISCUSS

Team members walk around, review and discuss ideas.

3 VOTE

Each team member votes for the most effective ideas.

VOTING RESULTS (TOTAL SCORE)

4 SELECT

Idea with the highest score is selected.

EVALUATION CRITERIA

Ideas were evaluated based on the following criteria:

User Usefulness

How useful and beneficial is the idea for the users?

Technical Feasibility

Can we build it with available resources?

Motivation Potential

Can it motivate students to stay consistent?

Innovation

How unique and creative is the idea?

Real-World Impact

Will it create meaningful impact in real life?

WHY SELF-PROCTORED LEARNING SYSTEM WAS SELECTED?

- ✓ Received the highest overall score (15 points).
- ✓ Addresses the core pain points identified during the Define Stage.
- ✓ Empowers students with planning, focus, tracking, and motivation in one integrated solution.
- ✓ Promotes student ownership and builds consistent study habits.

OUTCOME: The Self-Proctored Learning System is selected as the final concept to reduce student procrastination and build consistent study habits.

Our Final Concept

1

Plan

Personalized planner & smart study scheduler with clear daily goals.

2

Focus

Self-proctored sessions with focus timer and distraction monitoring.

3

Track

Progress dashboard with study streaks, points & badges system.

4

Improve

AI assistant & smart reminders to build consistent study habits.

Before vs. After Transformation

BEFORE: Procrastination →
Distraction → Delayed Tasks → Stress →
Poor Consistency → Low Productivity

Expected Impact

↓60%

Procrastination

↑85%

Consistency

↑70%

Motivation

AFTER: Planning → Self-Proctoring → Focused
Study → Progress Tracking → Consistent Learning →
Better Results

Thank You
